

2016-17 Academic Year Projects

SHINE believes that all children should have the chance to succeed irrespective of their background and family income. In the 2016-17 academic year we are supporting 96 projects across the breadth of our programmes, investing £1.7 million into innovative, educational projects. These projects will see the lives of over 25,000 children in England be transformed, giving these children the opportunity to access additional educational support and helping them to achieve their full potential.

Teacher-led innovation
